

ECO-KITCHEN (ECOZYME FG 550)

Food industry approved non-corrosive degreaser and cleaner.

Intertek tested and approved against SANS 1828 standards

Conforms to Toxicological Safety for Use in Direct Food Contact Application
Certificate No: 2018IS/TS/0328

Eco-Choice Type 1 Eco Accreditation

Concentrated cost saving high performance formula

Product Description:

ECO-Kitchen (Ecozyme FG 550) is a SANS 1828 independently tested and approved multi-purpose heavy duty degreaser and general-purpose cleaner designed and tested specifically for use in the food, beverage and related industries.

ECO-Kitchen (Ecozyme FG 550) is independently tested and certified by Intertek to SABS SANS 1828 standards and is completely HACCP (Hazard Analysis and Critical Control Point) Standards Compliant.

It is Eco-Choice Type 1 eco accredited against global certification standards.

ECO-Kitchen's concentrated formula has been conclusively proven to have very significant cost savings and performance improvements for use in multiple industries.

Some Industry Applications:

- Food processing plants
- Hospitals & medical centers
- Industrial kitchens
- Breweries
- Abattoirs
- Post-harvest processing
- Tanker Washing
- Animal Farming
- Canned food manufacturing
- Soft drink beverage plants
- Sauce blending plants
- Chemical factories
- Starch processing plant

Recommended Use:

Use dilution ratios 1:1 to 1:5 dilutions for heavy duty degreasing.

Use dilution ratio 1:10 for general purpose cleaning and degreasing.

Use dilution ratios 1:100 to 1:200 for floor and wall cleaning.

Use **ECO-Virus X** (Virus Gobbler™) to disinfectant surfaces after cleaning.

Shelf Life & Storage:

Store in a cool, dry place. Stable for 12 months.
